DeCon "U" Shower Station

Designed for rapid deployment, the **Firetak** Shower Station provides for containment of overspray from the decontamination process, while also providing privacy. The fiberglass frame is a pop-up style for easy one person set up and no air or tools are required.

All heat sealed materials in this package are heavy duty PVC, designed to withstand severe temperatures and are impervious to most chemicals. The **station is made up of four (4) components: shelter, shower, Econo*Pool and secondary containment berm** which when collapsed, fit into compact storage cases. All components can be purchased separately.

The portable DeCon "U" Shower is specifically designed to deploy quickly and to minimize the amount of waste water created during the decontamination process. Constructed of high strength aluminum tubing that is powder coated for chemical and corrosion protection and Cam-Lok couplers and garden hose fitting are standard. Comes complete with storage case. The shower can be used independently or in conjunction with the many other Firetak products available.

Assembled Size:
50" wide x 7' 6" high

Stored Size:
54" x 30" x 5"
